

Organic Broiler Feed - Starter

Prepared for the first period, when broiler chicks grow rapidly. It is aimed at providing a balanced supply of the energy, protein, amino acids, vitamins and minerals needed in the early period and at supporting healthy development.

Analytical constituents

PARAMETER	VALUE	UNIT
Crude protein	22–24	%
Metabolisable energy (ME)	2950–3100	kcal/kg
Crude fat	4–7	%
Crude fibre	2.5–4	%
Crude ash	5–7.5	%
Calcium (Ca)	0.9–1.1	%
Phosphorus (P)	0.6–0.9	%
Sodium (Na)	0.16–0.22	%

PRODUCT FORM
Mash compound feed

PACKAGING
25 kg PP bag · 50 kg PP bag · 25 kg kraft bag · 1,000 kg big bag · Bulk

ORIGIN
Türkiye

Balanced feeding in the first development period

The first 20 days of a broiler's life are an important period in which fast growth begins and the skeleton, muscles and digestive system develop intensively. The aim in this period is to support development appropriate to the chicks' age while building a strong, healthy foundation for growth.

Bioyem Organic Broiler Starter Feed is an organic compound feed prepared for the nutritional needs of 0–20-day-old broiler chicks in the starter period.

In this period, broilers' nutrient needs differ from those of the later growth periods. A balanced supply of energy, protein and amino acids in particular is important for

muscle development, skeletal structure and age-appropriate live weight gain.

Applying the right feeding programme in the starter period supports a healthy, balanced transition of broilers to the grower period.

PERIOD OF USE
0–20 days

TARGET ANIMAL
Broiler chicks

PRODUCT TYPE
Organic compound feed

The parameters stated above represent generally accepted values and may vary by batch; binding values are communicated at the time of enquiry during the resulting discussions.
