

Organic Broiler Feed - Grower

Prepared for the grower period, in which broilers continue to gain live weight rapidly. Taking the changing nutrient needs into account, it supports balanced continued growth and reaching the right live weight.

Analytical constituents

PARAMETER	VALUE	UNIT
Crude protein	20-22	%
Metabolisable energy (ME)	3050-3150	kcal/kg
Crude fat	4.5-7.5	%
Crude fibre	3-4	%
Crude ash	4.5-6.5	%
Calcium (Ca)	0.8-1	%
Phosphorus (P)	0.6-0.7	%
Sodium (Na)	0.16-0.21	%

PRODUCT FORM
Mash compound feed

PACKAGING
25 kg PP bag · 50 kg PP bag · 25 kg kraft bag · 1,000 kg big bag · Bulk

ORIGIN
Türkiye

Balanced management of the fast growth period

The 21-42-day period is the main growth period in broilers, in which live weight gain speeds up and muscle development continues intensively. At this stage, the feeding programme needs to be managed in line with the birds' increasing nutrient needs.

Bioyem Organic Broiler Grower Feed is an organic compound feed prepared for the nutritional needs of 21-42-day-old broilers in their fast development period.

In this period, the balance of energy and protein levels in particular, as well as amino acids, minerals and other nutrients, becomes important. The aim is not only to increase live weight, but to support growth rate, muscle

development, body structure and overall flock performance together.

During this period of fast development, regularly monitoring feed intake and live weight gain helps run the feeding programme in line with the flock's needs.

Managing the grower period well supports broilers moving into the finisher period in good condition.

PERIOD OF USE
21-42 days

TARGET ANIMAL
Broilers in the grower period

PRODUCT TYPE
Organic compound feed

The parameters stated above represent generally accepted values and may vary by batch; binding values are communicated at the time of enquiry during the resulting discussions.
