

Organic Broiler Feed - Finisher

Prepared for the nutritional needs of broilers approaching slaughter. Taking the changing feed intake and nutrient needs of this period into account, it is aimed at supporting live weight gain and the overall condition of the flock.

Analytical constituents

PARAMETER	VALUE	UNIT
Crude protein	18.5–20.5	%
Metabolisable energy (ME)	3150–3250	kcal/kg
Crude fat	5–8.5	%
Crude fibre	3–4.5	%
Crude ash	4–6	%
Calcium (Ca)	0.7–0.9	%
Phosphorus (P)	0.55–0.65	%
Sodium (Na)	0.16–0.2	%

PRODUCT FORM
Mash compound feed

PACKAGING
25 kg PP bag · 50 kg PP bag · 25 kg kraft bag · 1,000 kg big bag · Bulk

ORIGIN
Türkiye

Balanced development towards slaughter

From day 43, broilers approach the later stage of growth and the slaughter period. While live weight gain continues in this period, it becomes important to assess feed intake, body condition and overall flock performance together.

Bioyem Organic Broiler Finisher Feed is an organic compound feed prepared for the nutritional needs of broilers raised from day 43 onwards in the later growth and finishing period.

The aim of the feeding programme in this period is to support balanced growth and appropriate body condition up to slaughter while the birds continue to develop.

The balance of energy, protein and amino acids and the adequacy of minerals and other nutrients are important for live weight gain, muscle structure and overall flock performance.

Running the feeding programme in the finishing period in line with the birds' age, development and planned slaughter date helps complete the final stage of rearing in a balanced way.

PERIOD OF USE
Day 43 onwards

TARGET ANIMAL
Broilers in the finishing period

PRODUCT TYPE
Organic compound feed

The parameters stated above represent generally accepted values and may vary by batch; binding values are communicated at the time of enquiry during the resulting discussions.
