

Organic Calf Feed - Rearing

Prepared for the period after weaning, in which growth continues rapidly. Taking the increasing development and feed intake needs into account, it supports steady continued growth and prepares the calf for the young stock period.

Analytical constituents

PARAMETER	VALUE	UNIT
Crude protein	16.5–18	%
Metabolisable energy (ME)	2650–2800	kcal/kg
Crude fat	2.5–4.5	%
Crude fibre	9–12	%
Crude ash	6.5–8.5	%
Calcium (Ca)	0.65–0.85	%
Phosphorus (P)	0.4–0.55	%
Sodium (Na)	0.18–0.25	%

PRODUCT FORM
Mash compound feed

PACKAGING
25 kg PP bag · 50 kg PP bag · 25 kg kraft bag · 1,000 kg big bag · Bulk

ORIGIN
Türkiye

Balanced growth after weaning

The 3–6-month period is an important stage in which the calf moves away from the milk period, relies more heavily on solid feed and continues to grow. The aim in this period is to support healthy, controlled growth appropriate to its age, rather than fast but unbalanced development.

Bioyem Organic Calf Feed is an organic compound feed prepared for the nutritional needs of 3–6-month-old calves in their post-weaning development period; as a concentrate, it does not replace roughage and is used together with roughage in the ration.

In this period, a balanced supply of energy, protein, amino acids, minerals and fibre is important for skeletal and

muscle development as well as continued development of the digestive system.

As feed intake increases after weaning, the calf's growth performance and body condition need to be monitored regularly. Running the feeding programme in line with age and development lays the foundation for stronger, more balanced development in later periods.

PERIOD OF USE
3–6 months

TARGET ANIMAL
Calves aged 3–6 months

PRODUCT TYPE
Organic compound feed

The parameters stated above represent generally accepted values and may vary by batch; binding values are communicated at the time of enquiry during the resulting discussions.
